Overview

Exterro was founded with the simple vision that applying the concepts of process optimization and data science to how companies manage digital information and respond to litigation would drive more successful outcomes at a lower cost. We remain committed to this vision today. We deliver a fully integrated Legal GRC platform that enables our clients to address their privacy, regulatory, compliance, digital forensics, and litigation risks more effectively and at lower costs. We provide software solutions that help some of the world's largest organizations, law enforcement and government agencies work smarter, more efficiently, and support the Rule of Law.

Resolved Issues

1. Resolved a vulnerability where execution of malicious UFDR XMLs could lead to file exfiltration. **(FCR-72008)**
2. Resolved an issue where entering an incorrect password in the VeraCrypt/TrueCrypt decryption pop-up did not display an error dialog and incorrectly accepted the invalid entry. An error message is now displayed when an invalid password is entered. **(FCR-51336)**
3. Updated the legacy ad_driver.sys file; the older version is now cleaned up from the installer. **(FTKIP-1132)**

Contact Exterro

If you have any questions, please refer to this document, or any other related materials provided to you by Exterro. For usage questions, please check with your organization's internal application administrator. Alternatively, you may contact your Exterro Training Manager or other Exterro account contact directly.

For technical difficulties, support is available through support@exterro.com.
